## Working with Clay

We can use clay to make 3D artwork. 3D artwork can be a sculpture designed to be seen from all sides, or it can be raised relief, like the tiles that we have made.

## Illustration and Storyboards

An illustrator is an artist whose work helps to tell a story. They create artwork which shows images from the story. Some illustrators (and authors) use storyboards to help them plan their work. In comic books, these storyboards contain both the illustration and the text, and they tell the whole story visually.
