

Key vocabulary

technological design	Using technology to design a product
software	A program that tells the computer what to do

online safety

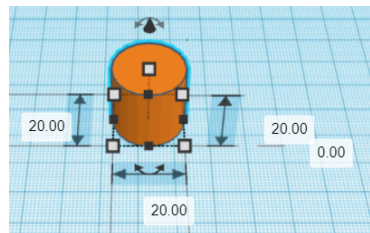

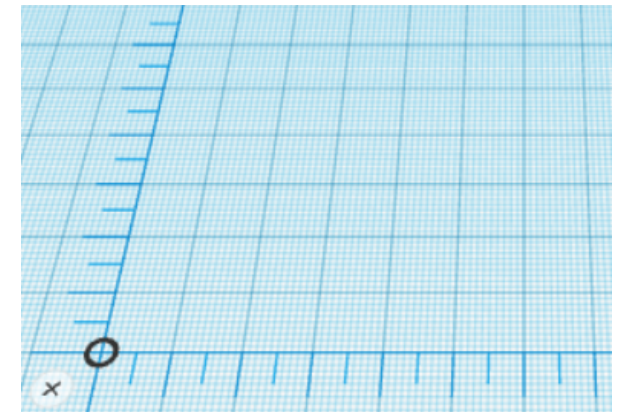

Key knowledge

Technological design can be used to plan a project. Using technology makes it easier to plan a project because it is easy to edit and undo using the software tools.

Tinkercad is a piece of software for technological design.

Tinkercad works on a grid system which will improve a project because it is more precise than drawing by hand.

Measurements can be input into Tinkercad to ensure accuracy.
