

# Recycled Materials

## Ifeoma Anyaeji

Anyaeji is a contemporary artist from Nigeria. Her work repurposes non-recyclable plastic bags and turns them into beautiful sculptures and installations. She uses a technique based on hair threading, a traditional Nigerian method for creating hairstyles which have a sculpture-like quality.

## Installation

An installation is an artwork that is made for a given location. Canadian artist Katharine Harvey has created installations by re-using the same collection of waste plastics which highlights the issue of plastic pollution.
